STUDENT HEALTH SERVICES

**Shortage of Yellow Fever vaccine YF-VAX®**

The manufacturer Sanofi Pasteur confirms that YF-VAX® is unavailable to order in the USA until mid-2018 as the company transitions to a new facility. Sanofi Pasteur has worked with the FDA to make another yellow fever vaccine available in the US through an Expanded Access Investigational New Drug. This new vaccine, manufactured by Sanofi Pasteur in France, is STAMARIL®

Locations with this vaccine are limited to a number of sites due to Sanofi Pasteur needing to oversee and support the clinical trial. **As a result, Student Health Services at the College of Charleston may be unable to offer the Yellow Fever vaccine at this time.**

However, the list below includes clinics in South Carolina with the potential of offering vaccine to our students. Please note, only one of these is in our local area. Our Students will need to call ahead for an appointment. Unfortunately, we do not have any pricing information nor can we guarantee that these clinics will be able accommodate your request for the vaccine.

**South Carolina**

Clemson University Joseph F. Sullivan Center

101 Edwards Hall  
200 Epsilon Zeta Drive  
Clemson, SC 29634  
Phone: 864-656-3076

Passport Health

37 Villa Rd, Ste 40  
Greenville, SC 29615  
Phone: 877-358-8648

Passport Health

260 W Coleman Blvd, Suite B  
Mount Pleasant, SC 29464  
Phone: 877-358-8648

**\*\*Please note:** Persons receiving the Yellow Fever vaccine are not fully vaccinated against the virus for 10 days following dose administration. Please plan your travel accordingly.
